

Compactors

National Surgical Corporation compactors: custom made, high quality, space saving

ALLOW MAXIMUM USE OF SPACE

Installing a compactor is beneficial in areas with space restrictions as it can increase storage space by up to 40%

HIGH QUALITY MANUFACTURING

Manufactured in heavy duty iron wire with support bridges under each shelf, which allows for high load capacity and structural rigidity. Stainless steel compactors also available

STREAMLINED MOVEMENT OF BAYS

Compactors use ball bearings which allow streamlined movement of each mobile bay, even with large or bulky goods. Can hold up to 100kg per shelf

CUSTOM MADE

All compactors are custom designed using AutoCAD drawings to suit your room size, layout and product and storage requirements

EXPERT ADVICE

NSC has installed and delivered shelving systems to over 140 customers, and understands the needs of an operating theatre, CSSD or hospital store room

EASIER CLEANING

Chrome wire allows air to circulate. Each unit is assembled with 250mm of space between the floor and the first shelf, allowing for easier cleaning and greater access to dust

CONFORM TO AS4187

NSC assists our customers in designing and installing compactors that allow them to conform with Australian Standard AS4187:2003

EXPERIENCED INSTALLERS

NSC has experienced installers who can build your compactor unit to the correct design and layout. Instructions are also available

Compactors

Before - without any shelving units

After - installing compactors on both sides of the door way

Call us to arrange a site inspection to arrange a formal quotation and AutoCAD drawing
